

Grad Song

BY, MR. BARTHEL

CLASS OF 2021

It's your graduation day, you found a way, you're done
You've rolled with the ups and downs and at times, it wasn't fun
Your masks never seemed to fit, the floor arrows were ignored
You had class from your bed sometimes
watching zoom sessions on record

Yet, you still made the most of what was a challenging year
You showed up with a smile, did your best, now you're here

Now move on, as you are, go make the world a better place
Be curious to keep growing, look to learn from your mistakes

Some of you may feel an urge to leave the nest
Not considering all the pros and cons will leave you stressed
Freedom comes with some bill\$ and some things that will surprise
So keep a key to your parent's house so they can dry your eyes

Now move on, as you are, go make the world a better place
Be curious to keep growing, give people space to make mistakes

Look to create a bit more than you consume
A challenging goal but with some grit, you can come through
Seek to understand those with a different point of view
The mystery is lost if you hold back and just assume

So I need you to press on,
Heaven is a place not so far away
We all know we should be the ones to bring
More glimpses to earth
So grab His hand and hold on
Tell Him everything that you need to say
'Cause we know how it feels to have someone
Feels to have someone who's guiding your way

So today marks the day when your new adventure starts
Lean on each other, and as you do, follow your heart

and move on, as you are, to make the world a better place
And thanks for the memories, now go on and celebrate
yes, thanks for the memories, now go on and celebrate
